PROJECTS

Code Pieces | GITHUB REPO | FRONTEND DEVELOPER

React application that simply allows you to create post about coding. Uses an API built with NodeJS that has authentication built into it.

- Used react router for routing, custom hooks used to manage state, axios used to connect to database and node sass used for styling.
- Implemented features include login, logout, private routes, the ability to create, delete and like or unlike a piece.

Design Hub | GITHUB REPO | FRONTEND DEVELOPER

Web application for designers, giving them a place to upload their projects to get feedback from and collaborate with other designers and potential employers.

- Worked remotely for 8 weeks, with a team of 8 developers on an existing code base.
- Used react as a framework, redux for state management, and SASS for styling, to develop a new layout, add notification capabilities, and implement a new collaboration feature.

CMS | GITHUB REPO

A basic management system to keep track of business-related resources. Users can login to manage their business resources, such as customers, merchants, and products, all on one dashboard, making managing business easier.

- Used react to build the frontend and Firebase is being used to manage database resources and deployment.
- Functionality includes registration, sign-in and the ability to perform basic CRUD operations on the data.

EXPERIENCE

Lambda School, Section Lead, Remote

JULY 2019 – NOVEMBER 2020

- Working with a team of developers guiding sections of 90 or more students through a web development curriculum.
- Individual student and team mentoring used to prepare students for daily and weekly projects.
- Delegated tasks between team leads and work with instructors to ensure lecture and project content is complete and concise.
- Helped students learn how to learn and solve problems effectively.
- Tracked student progress by conducting daily stand up meetings, maintaining student records, completing project reviews, and delivered one on one feedback.

SKILLS

- HTML5
- CSS3
- Responsive Design
- JavaScript
- React
- Web Accessibility
- Nextjs
- Firebase

EDUCATION

Lambda School, FULL STACK WEB DEVELOPMENT

March 2019 - Present

A challenging Full Stack Web Development curriculum that focused on building projects while learning how to work on teams with deadlines. Learned how to learn new technologies quickly and used git for version control and collaboration.

Colorado Technical University, BSIT

MAY 2016 - MAY 2020

3.4 GPA

Four-year asynchronous remote program that focused on basic web development principles and developing technologies that has given me the development foundations I needed.
